[Bibliography](#)**#2214241. Abstract**

FIELD: medicine, therapy, endocrinology. SUBSTANCE: invention relates to treatment of obesity. Invention proposes to use topiramate in daily dose 25-400 mg. Method provides significant reduction of weight gain rate in mammals due to diminishing metabolic effectiveness of food, in part, with selective reduction of formation and accumulation of lipids in adipose tissue. EFFECT: enhanced effectiveness of treatment method. 3 cl, 3 tbl, 1 ex
